

As an apprentice you earn while you learn!

Become an Apprentice and we will find you a real job with a real salary and real prospects. Our vacancies give you a 'foot in the door' to sectors or employers that might normally be out of reach. Your job will be combined with hands-on training, leading to qualifications that are nationally recognised by employers. We aim to offer better jobs, more support and higher grade training opportunities than anywhere else. Our key services include:

Career Profiling

In an initial diagnostic interview we identify your existing skills, attributes and ambitions and help you decide the best career route to follow.

Job and Salary - to match your skills and ambitions

We help you make sure that you are in the right job role that matches your experience and that you are paid appropriately (see National Apprenticeship Service website for more information). One of our Advisers work with you and the employer to ensure a perfect match and appropriate salary.

Training and Qualifications

We combine the best and most appropriate vocational training to go with your job. The certification and accreditation you achieve will enhance your career prospects and make you more employable in the future.

Support

Your dedicated Advisor will coach and support you throughout your apprenticeship. If you have any issues with your Employer your advisor will help work things out.

The Safety Net

If things don't work out for you with one employer we will help you to find another as quickly as possible.

A Wider Choice

If you have not decided what career path to take, you get a unique opportunity to work for more than one company within a sector; this offers you wider exposure to training and work experiences.
